

2T9050 5 in 1 DURESS TAG

Product Information Sheet

The Protrac ID 2T9050 tags are Ultra Long Range RFID tracking tags with an in built membrane switch and indicator for manual call functions such as emergency call, nurse duress/man down and machinery stop.

The 2T9050 tags are attached using ID card straps or lanyards. Tags have a standard ID card footprint (CR80) for attaching a photo ID.

All models are available with in built MIFARE, HID prox or HID i-class electronics making the 2T9050 a personal photo ID, access control, tracking and emergency call transmitter all in the one "credit card" sized tag.
